APPLICATION INFORMATION

We would like to delve into your motivation and the professional background that drives your application.

Which technical skill/stack are you interested in learning? *

This batch is open for **Engineering position (Java/ Javascript)**. If you are considering other roles, please select "Others" so we can keep your application for future opportunities that match.

- (●) Engineering position (Java/ Javascript)
- ( ) Other:

Have you previously applied for WeCamp ? *

- ○ Yes
- ◉ Not yet

Do you have any coding experience? If yes, why do you want to learn more? If no, do you have plans to learn? *

Yes, I have experience in both frontend and backend development. Most of my learning has come through projects and work, but I now want to strengthen my fundamentals and fill in knowledge gaps through a structured bootcamp. In the past, I focused on working quickly and extensively without deep, formal training. That's why I'm eager to gain hands-on experience in modern software development through this program.

What technologies are you most passionate about? *

Please share with us your story and why you want to work in tech.

I'm passionate about Java Spring Boot and Angular, and cloud-native technologies: such as Docker, Kubernetes, AWS, and modern DevOps practices. My journey into tech began unconventionally—I started with a Multimedia degree at FPT Arena, which gave me a strong foundation in UX/UI design and creative problem-solving. However, I discovered my true passion when I built my first web application. The ability to transform ideas into functional products that solve real problems to +1k users fascinated me.

Your English qualifications *

E.g. IELTS 5.5

TOEIC 710

Your attached English qualifications

What do you expect to achieve from the program? *

Please share with us what you want to improve/learn during and after joining WeCamp.

Master Java Spring Boot for enterprise-grade microservices architecture and deepen my Angular expertise. Strengthen fundamentals through structured mentorship that self-learning can't provide. Advance to Starcamp for real banking project experience. Improve soft skills and English for global collaboration. Long-term: become a Solutions Architect building scalable fintech systems

Do you have any questions for us?

- Will I have a dedicated team of mentors providing hands-on training, and can I expect strong, personalized support throughout the program?
- Could you share more details about the WeCamp curriculum structure and daily training schedule?
- If I perform well during WeCamp, is there a possibility of direct conversion to a full-time Software Engineer position at NAB Vietnam?
